[Portfolio](#)

AI/ML Engineer with hands-on experience in Machine Learning, Deep Learning, NLP, and Data Analytics. Skilled in Python, SQL, TensorFlow, Scikit-learn, LangChain, and Power BI, with internship experience in data analysis and business intelligence. Built AI solutions including LLM-powered analytics systems, legal document intelligence platforms, computer vision applications, and predictive machine learning models. Experienced in data preprocessing, feature engineering, model evaluation, and transforming complex datasets into actionable business insights.

TECHNICAL SKILLS

Programming Languages: Python, SQL

AI/ML & Deep Learning: Scikit-learn, TensorFlow, Keras, CNN, Neural Networks, Classification, Regression, Feature Engineering, Model Evaluation, OpenCV

Generative AI & NLP: NLP, LLMs, RAG, LangChain, Prompt Engineering, Transformers, Semantic Search

Data Science: Pandas, NumPy, EDA, Data Cleaning, Statistical Analysis, Time Series Forecasting

Visualization: Power BI, Tableau, Advanced Excel (Pivot Tables, VLOOKUP, XLOOKUP)

Tools & Technologies: Git, GitHub, Streamlit, Flask, Django, Jupyter Notebook, VS Code

Databases: MySQL

EXPERIENCE

Data Analyst Intern

Gamaka Intellectual Machines Pune (July 2025 – Dec 2025)

- Designed and maintained Power BI dashboards using DAX and data modeling to support finance and operations reporting, enabling KPI tracking and business performance monitoring.
- Processed and transformed business data using SQL and Python, improving data quality, consistency, and reliability for analytics workflows.
- Performed EDA, statistical analysis, and data validation to identify trends and support accurate reporting across teams.

PROJECTS

1. LexiMind Legal Document Intelligence System | ML + Transformer + semantic similarity

- Developed a machine learning-based legal judgment classification system achieving ~92% accuracy on 17K+ legal documents across categories such as murder, rape, and land acquisition cases.
- Generated contextual embeddings using Sentence Transformers and implemented semantic similarity search using cosine similarity.
- Built a legal case retrieval pipeline that returned Top-5 relevant judgments based on semantic meaning, improving legal research and reference discovery.

2. Data Analyst AI Agent | Gemini LLM + Automated EDA + Flask

- Developed an AI-powered data analytics assistant enabling natural language interaction with structured datasets.
- Automated exploratory data analysis (EDA), including statistical summaries, missing value detection, and data cleaning.
- Implemented dynamic visualizations and conversational analytics to accelerate insight generation from business data.

3. Face Mask Detection System | CNN + Streamlit Deployment

- Developed a CNN-based deep learning model achieving ~98–99% accuracy for multi-class face mask detection.
- Integrated OpenCV face detection with image preprocessing and real-time inference pipelines.
- Built an interactive Streamlit application for live mask detection while addressing dataset bias and deployment challenges.

4. Bank Term Deposit Subscription Prediction

- Developed machine learning models on 41K+ banking records to predict customer term-deposit subscriptions.
- Addressed class imbalance using weighted learning techniques and evaluated performance using Precision, Recall, and F1-score.
- Compared Logistic Regression, KNN, Naive Bayes, and Random Forest models to identify key customer attributes influencing subscriptions.

EDUCATION

G H Raisoni College of Engineering and Management, Jalgaon

2022 - 2026

Bachelor of Technology (B.Tech)

Artificial Intelligence & Machine Learning
