Portfolio

AI/ML Engineer with experience building **predictive** and **machine learning models** across **NLP**, **tabular**, and **deep learning** domains to solve real-world problems. Proficient in **Python**, **Scikit-learn**, **TensorFlow**, and **SQL** with strong foundation in **statistics**, **forecasting**, and **model evaluation** on **datasets up to 40K+ records**. Experienced in developing **end-to-end ML pipelines** and translating data into actionable insights.

EXPERIENCE

Data Analyst Intern

Gamaka Intellectual Machines Pune (July 2025 – Dec 2025)

- Designed and maintained **Power BI dashboards** using **DAX** and **data modeling** to support finance and operations reporting, enabling better **KPI tracking**.
- Processed and transformed business data using **SQL** and **Python**, **improving data quality** and reliability for **analytics workflows**.
- Performed EDA**, **statistical analysis**, and **data validation**, **identifying key trends** and ensuring accurate, consistent reporting across teams.

SKILLS

- Programming & Data:** Python, SQL, Pandas, NumPy, Data Cleaning, Feature Engineering, Exploratory Data Analysis (EDA)
- Machine Learning & AI:** Scikit-learn, TensorFlow, Deep Learning (CNN), Natural Language Processing (NLP), Time Series Forecasting.
- Visualization & BI:** Power BI, Tableau, Matplotlib, Seaborn, Advanced Excel (Pivot Tables, VLOOKUP, XLOOKUP)
- Tools & Concepts:** Streamlit, Git, Model Evaluation, Statistics, End-to-End ML Pipeline)

PROJECTS

1. LexiMind — Legal Document Intelligence System

GitHub

- Built **NLP-based** classification model achieving **~92% accuracy** for legal judgment categorization on **17K+ documents**.
- Generated contextual **embeddings** using **Sentence Transformers** and implemented **cosine similarity**-based semantic search.
- Designed vector retrieval pipeline to **return Top-5 relevant legal cases** for efficient reference discovery.

2. Bank Term Deposit Subscription Prediction

GitHub

- Developed **ML models** on **41K+** banking records to **predict customer subscription** (11% minority class).
- Addressed **class imbalance** using **weighted models** and evaluated performance using **Precision**, **Recall**, and **F1-score**.
- Compared **Logistic Regression**, **KNN**, **Naive Bayes**, and **Random Forest** to identify key influencing features.

3. Face Mask Detection System (CNN + Streamlit Deployment)

GitHub

- Developed a **CNN-based model** using **TensorFlow** achieving **~98–99% accuracy** for **multi-class mask detection**.
- Integrated OpenCV face detection** and built an **end-to-end prediction** pipeline with preprocessing and real-time inference.
- Built and deployed** an **interactive Streamlit web app**, resolving real-world issues like dataset bias and TensorFlow-Python compatibility.

4. Data Analyst Agent (LLM + Automated EDA)

GitHub

- Built an **LLM-powered assistant** using prompt engineering and semantic search to **perform automated EDA** and **answer natural language queries** on structured datasets.
- Supported **CSV**, **Excel**, **PDF**, and **Word** inputs through integrated processing pipelines.
- Enabled faster insights using **conversational AI** with **statistical analysis workflows**.

EDUCATION

G H Raison College of Engineering and Management, Jalgaon

2022 - 2026

B-Tech in Artificial Intelligence & Machine Learning
